

The following is provided to the NWS FMCs to assist in determining what actions are required in implementing the Congressional mandated appropriation structure change in Fiscal Year 2005. To enhance the understanding of this information, the FY 2005 Project Code listing is separately attached. Should you have any questions, please contact your NWS Budget Analyst.

1. Program Codes that were used during the FY 2005 Continuing Resolution and that will continue under the FY 2005 Appropriation:

	32	04-03-01-007	WEATHER & CLIMATE SUPERCOMPUTING
	32	04-03-01-010	WEATHER & CLIMATE SUPERCOMPUTING - BACKUP

Appropriate obligations under the above program codes do not require adjustment. However, FMCs are to ensure that the current Cxx5xxx project codes are used for all future obligations. There are no requirements to modifications to purchase orders/contracts with undelivered orders.

2. Program Codes that were used during the FY 2005 CR and that were not funded under the FY 2005 Appropriation:

Obligations in the above program codes require adjustment into a base account, unless another appropriate alternative exists. FMCs are required to make modifications to purchase orders/contracts with undelivered orders. Note that Facility (WFO) Maintenance was funded NOAA wide. NWS is awaiting guidance from NOAA Facilities. The policy of obligating traditional WFO Maintenance costs to Base funding remains in effect until further notice.

3. Program Codes that were used during the FY 2005 CR and now have new program codes due to the change in appropriation structure:

	32	04-03-01-012	WFO CONSTRUCTION	►	34	04-04-01-001	WFO CONSTRUCTION

Obligations in the above CR program codes require adjustments into the new FY 2005 Appropriation program codes or another appropriate alternative. FMCs are required to make modifications to purchase orders/contracts with undelivered orders using the above new program codes. Note that only the Aviation Weather Initiative will use the new Aviation Weather program code 04-04-03-001. All other organizations will utilize Base funding for aviation related obligations (see attached project code listing). Therefore, organizations other than Aviation Weather Initiative are required to adjust obligations from the CR Aviation Weather program code of 04-04-01-027 into Base or another appropriate account.

4. New Program Codes (PPAs) under the FY 2005 Appropriations:

	Fund Code	Program Code	Description
ORF	31	04-04-01-009	AIR QUALITY FORECASTING
	31	04-04-01-011	HAWAII DATA BUOYS

Any obligations made to Base accounts that are appropriate to any of the above program codes should be adjusted into the appropriate new program code.

5. CR Program Codes that were consolidated under the FY 2005 Appropriations:

CR				FY 2005 Appropriation		
Fund Code	Program Code	Description		Fund Code	Program Code	Description
31	04-04-01-001	NEXT GENERATION WEATHER RADAR (NEXRAD)	▶	31	04-02-02-001	ALL SYSTEMS OPERATIONS & MAINTENANCE
31	04-04-01-002	AUTOMATED SURFACE OBSERVING SYSTEM (ASOS)				
31	04-04-01-003	ADVANCED WEATHER INTERACTIVE PROCESSING SYSTEM (AWIPS)				
31	04-04-01-301	GATEWAY BACK UP - MT. WEATHER (RECURRING OPERATIONS)				

The FY 2005 Appropriation consolidated “All Systems Operations & Maintenance” under one, new Program Code. Therefore all obligations in the above CR program codes require adjustment into the new, consolidated FY 2005 Appropriation program code or an appropriate alternative. FMCs are required to make modifications to purchase orders/contracts with undelivered orders using the above new program codes.
